

# Interoperability Montana

This map depicts projected communications sites in the Interoperability Montana project and is published to provide Consortiums with a projection of when a communications site will be constructed based on the best information available on the publication date.

This projection is based on the following presumptions:

- \* The site agreement requirements for the communications site will be completed by the date projected for construction.
  - \* The frequencies programmed will meet field requirements without change as of the date projected for construction.
  - \* The communications sites depicted will not require additional equipment or construction costs due to unforeseen field conditions.
  - \* The cost of projected communications site infrastructure equipment will not increase.
  - \* The microwave pathway presentation is subject to change based on site agreement, frequency modulation, and/or price changes.
- This Document was prepared under a grant from the Office of State and Local Government Coordination and Preparedness (SLGCP), United States Department of Homeland Security.
